

VOUX theme documentation

Voux WooCommerce Shopping Theme

Created: 23/03/2015 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

Introduction

Thank you for purchasing my theme. If you have any questions that are beyond the scope of this help file, please feel free to email via my user page contact form [here](#). Thank you!

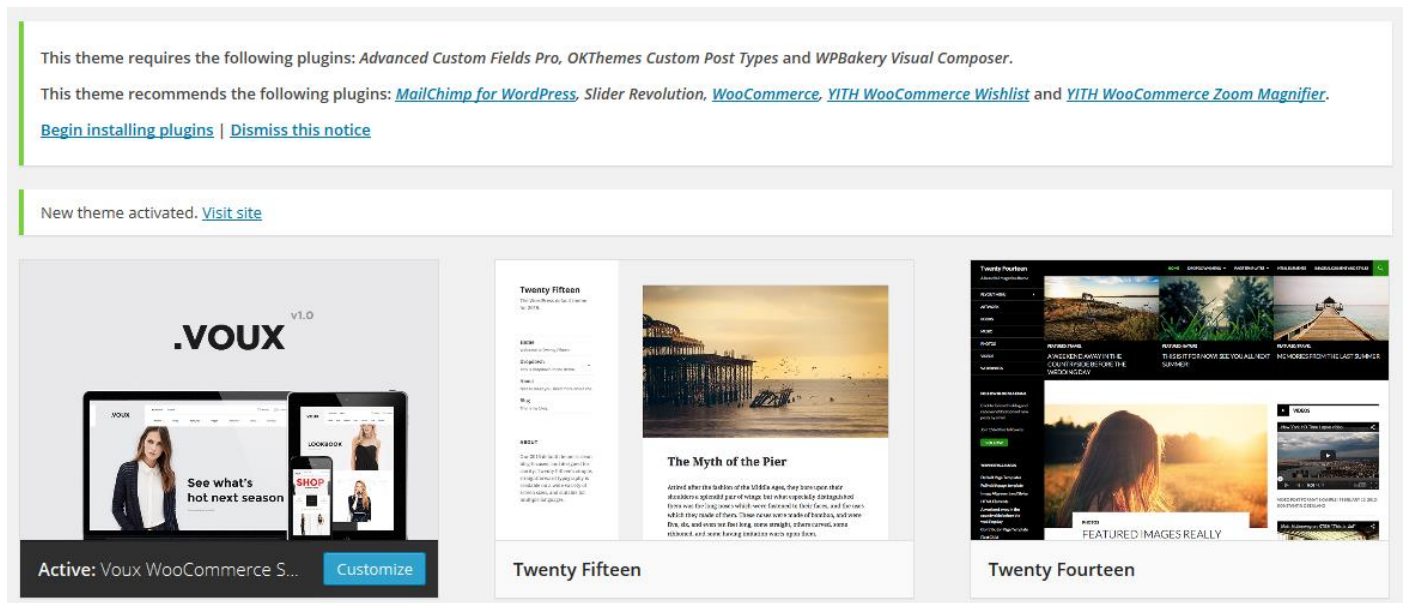

Installation

For proper installation please follow the next steps. Also please check the WordPress installation guide, which you find here [Installing WordPress](#)

This theme requires WordPress > 3.5.0

A. FTP Installation (manual)

1. First of all, your server should support **PHP 5.2.x**. You will also need an installation of WordPress. If you don't have one, download it from [here](#) and follow instructions on the WordPress site on how to install it correctly.
2. If you have a running installation of WordPress, place the theme files from the download into the "themes" folder. The path to this folder should be something like **/WordPress_install_dir/wp-content/themes/**. Make sure that all theme files (**without the PSDs and help files !**) are in the separate folder called **"Voux"**. The path to the theme files should be **/WordPress_install_dir/wp-content/themes/voux** upon completion of this step.
3. Enter you WordPress Admin Interface. It should be available at <http://yourdomain.com/wp-admin>.
4. In the left menu, find **Appearance** tab. Click it. A submenu should appear. Click **Themes**.
5. The themes screen should show all of your installed themes.
6. Find **Voux** theme and hit **Activate**.

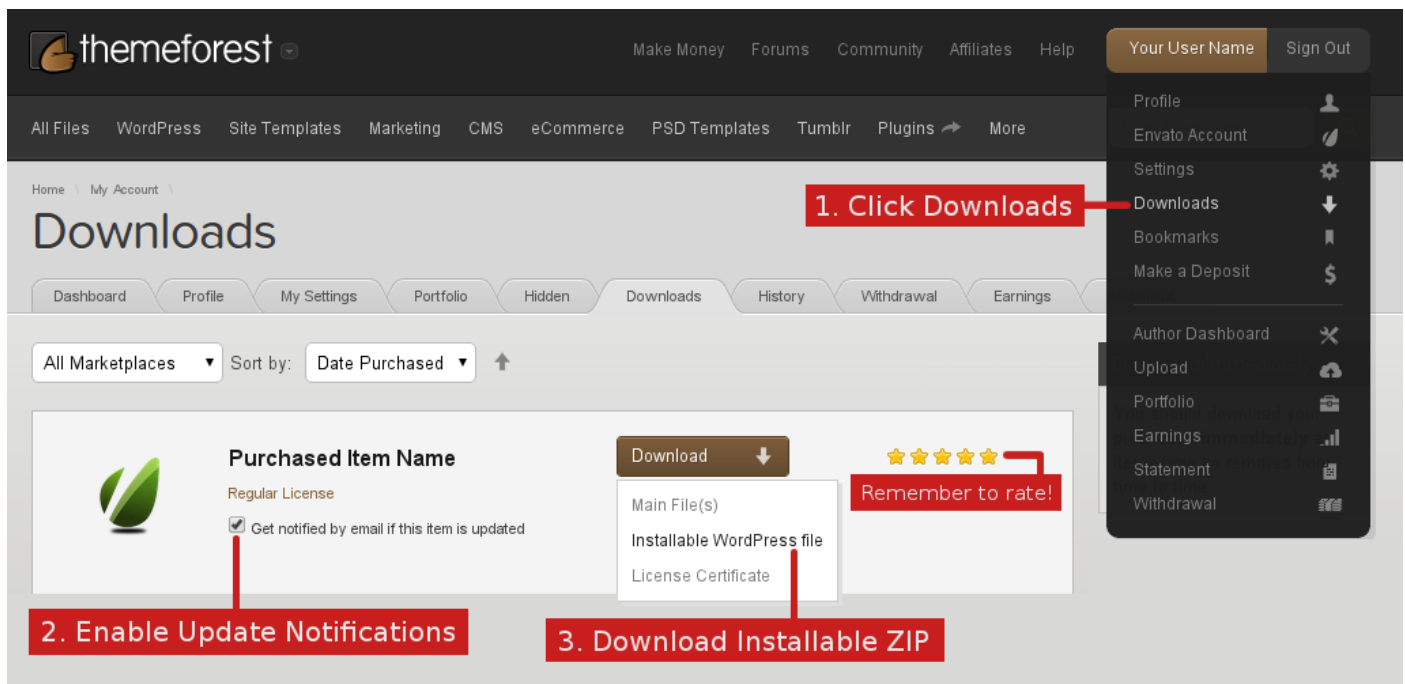

B. Through WP administration panels

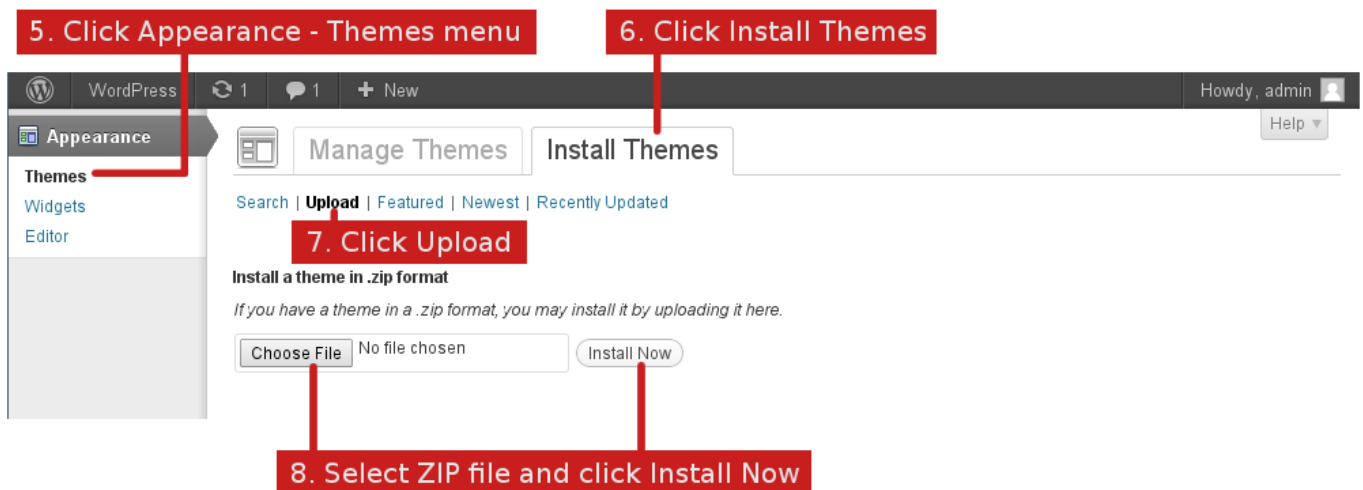

1. Log in to WordPress
2. Select the **Appearance** panel, then **Themes**.
3. Select **Install Themes**
4. Use the sub-menu and click on **Upload**. Choose the file **voux.zip** from the package you downloaded from TF and click **install now**.

Voux WooCommerce Shopping Theme

Created: 23/03/2015 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

4. Login to WordPress

C. Continuing install

Now as you have installed the theme, let's continue with the installation of plugins and demo content:

1. Install theme plugins
2. Install theme Demo Content

1. Install theme plugins

Once the theme is activated you'll see a message on every admin page stating **"This theme requires the following plugins....."**. Click on **"Begin installing plugins"**.

Voux WooCommerce Shopping Theme

Created: 23/03/2015 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

This theme requires the following plugin: *WPBakery Visual Composer*.

This theme recommends the following plugins: [MailChimp for WordPress](#), [Slider Revolution](#), [WooCommerce](#), [YITH WooCommerce Wishlist](#) and [YITH WooCommerce Zoom Magnifier](#).

[Begin installing plugins](#) | [Dismiss this notice](#)

Now, click on the checkbox next to “Plugin” to select all the plugins, then from the select box above select “Install” and click the “Apply” button. This will automatically install all the necessary plugins.

Install Required Plugins

→ Install ▼ Apply ←

<input checked="" type="checkbox"/>	Plugin	Source	Type	Status
<input checked="" type="checkbox"/>	WPBakery Visual Composer	Pre-Packaged	Required	Not Installed
<input checked="" type="checkbox"/>	MailChimp for WordPress	WordPress Repository	Recommended	Not Installed
<input checked="" type="checkbox"/>	Slider Revolution	Pre-Packaged	Recommended	Not Installed
<input checked="" type="checkbox"/>	WooCommerce	WordPress Repository	Recommended	Not Installed
<input checked="" type="checkbox"/>	YITH WooCommerce Wishlist	WordPress Repository	Recommended	Not Installed
<input checked="" type="checkbox"/>	YITH WooCommerce Zoom Magnifier	WordPress Repository	Recommended	Not Installed
<input checked="" type="checkbox"/>	Plugin	Source	Type	Status

Bulk Actions ▼ Apply

After all the plugins are installed click on “Return to Required Plugins Installer” to **activate them**.

Install Required Plugins

The installation process is starting. This process may take a while on some hosts, so please be patient.

Installing Plugin WPBakery Visual Composer (1/6)

WPBakery Visual Composer installed successfully. [Show Details](#).

Installing Plugin MailChimp for WordPress (2/6)

MailChimp for WordPress installed successfully. [Show Details](#).

Installing Plugin Slider Revolution (3/6)

Slider Revolution installed successfully. [Show Details](#).

Help

Dashboard

Welcome to WooCommerce – You're almost ready to start selling :)

Install WooCommerce Pages

Skip setup

Want to help make WooCommerce even more awesome? Allow WooThemes to collect non-sensitive diagnostic data and usage information, and get 20% discount on your next WooThemes purchase. [Find out more.](#)

Allow

No, do not bother me again

Voux WooCommerce Shopping Theme

Created: 23/03/2015 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

Now we'll proceed with the installation of theme demo content.

1. Install theme Demo Content

(Step 1) The demo content will install: pages, posts, post types, dummy images, menu settings, widget settings, WooCommerce settings and revolution sliders.

If you need them separately they're available in the **import** folder from the package.

The demo install is done with **1 click install**.

1. Go to **Appearance >> Import Demo Data**
2. Click on **"Import Demo Data"**

Import Demo Data

Importing demo data (post, pages, images, theme settings, ...) is the easiest way to setup your theme. It will allow you to quickly edit everything instead of creating content from scratch. When you import the data following things will happen:

- No existing posts, pages, categories, images, custom post types or any other data will be deleted or modified .
- No WordPress settings will be modified .
- Posts, pages, some images, some widgets and menus will get imported .
- Images will be downloaded from our server, these images are copyrighted and are for demo use only .
- Please click import only once and wait, it can take a couple of minutes

Before you begin, make sure all the required plugins are activated.

Import Demo Data

That's it, you have demo content and all the theme settings installed on your website.

Setting permalinks

You can setup your custom permalinks from **"Settings >> Permalinks"**. The recommended setting is **"Post name"**, select it and hit **Save changes**.

Permalink Settings

By default WordPress uses web URLs which have question marks and lots of numbers in them, however improve the aesthetics, usability, and forward-compatibility of your links. A [number of tags are available](#), a

Common Settings

<input type="radio"/> Default	<code>http://localhost/cumico/?p=123</code>
<input type="radio"/> Day and name	<code>http://localhost/cumico/2013/03/03/sample-post/</code>
<input type="radio"/> Month and name	<code>http://localhost/cumico/2013/03/sample-post/</code>
<input type="radio"/> Numeric	<code>http://localhost/cumico/archives/123</code>
<input checked="" type="radio"/> Post name	<code>http://localhost/cumico/sample-post/</code>
<input type="radio"/> Custom Structure	<code>http://localhost/cumico /%postname%/</code>

Optional

If you like, you may enter custom structures for your category and tag URLs here. For example, using `top` If you leave these blank the defaults will be used.

Install the theme in other language

First you have to install WordPress in your specific language. Go to **wordpress.org**, download and install WordPress in your language like you normally would.

For translation the theme comes with a .PO file which can be found in **/lang/en.po**

To translate that file into your language you need to make a copy and name it with your language tag. For example let's translate the theme in Dutch.

1. Make a copy of **en.po** and name it **de_DE** (language tag for Dutch)
2. Open the file you created with Poedit (www.poedit.net)
3. After opening you will see a column with the original strings. Click on each of them and translate them in the box below it.
4. After you made the translation save the file and copy it in **/lang/**
5. Now you have to instruct WordPress to use that file
6. Open **config.php** from WordPress root and find the line **define ('WPLANG', '');**
7. Change that line of code with your newly create po file. Like this:

define ('WPLANG', 'de_DE');

8. Save and you're done!

Here are a couple of video tutorials to help you get started:

<http://www.wpexplorer.com/videos/translating-your-WordPress-theme>

<http://www.youtube.com/watch?v=2Z86Rld7K1c>

General instructions (!important)

How to create a page

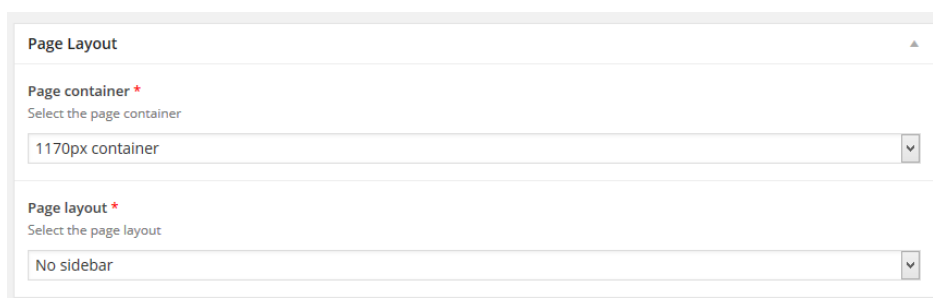

Go to "Pages >> Add new".

Each page has specific options **under the editor**, like page **Page Layout** and **Page Options**, which helps you to configure the page as you need. Also, every page supports a header image which can be displayed by adding an image in the **Feature image box**.

Page Layout Options

You have the possibility to select the page layout, full screen or 1170px in container and the page sidebar.

Voux WooCommerce Shopping Theme

Created: 23/03/2015 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

Page Options

You have the possibility to show/hide the header, page title and insert a page description. Also, you have the possibility to show social media in the footer and select a footer style dark and light. The page slideshow (Revolution slider must be active) is also set in this panel.

Page Options

Page header *

☒ Enable/Disable page header.

Page title *

☒ Enable/Disable page title.

Page footer social media *

☒ Enable/Disable page social

Page footer style

Select the footer style

Dark

Page description

Insert your page short description here.

Morbi leo risus, porta ac consectetur ac, vestibulum at eros. Donec ullamcorper nulla non metus auctor fringilla. Maecenas sed diam eget risus varius blandit sit amet non magna. Donec ullamcorper nulla non metus auctor fringilla. Vivamus sagittis lacus vel augue laoreet rutrum faucibus dolor auctor. Vestibulum id ligula porta felis euismod semper. Voux WooCommerce Shopping Theme

Created: 23/03/2015 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

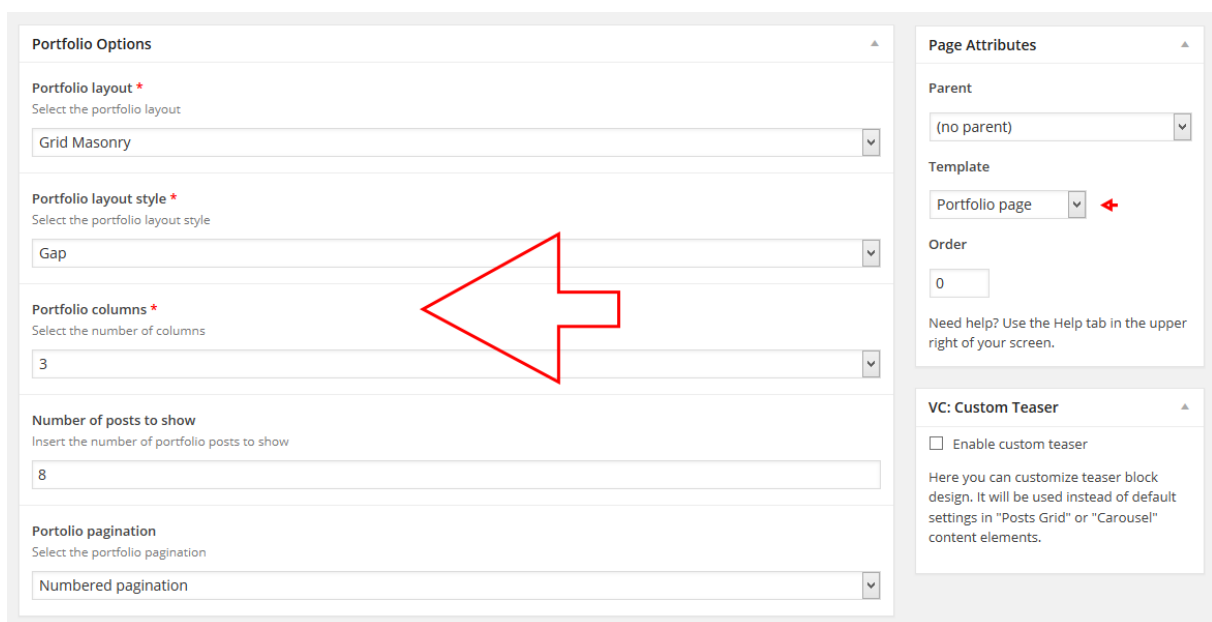

How to create a page template (Portfolio, Blog, Contact)

This theme uses custom post types to display specific page templates and posts. Each page template is created by selecting a page template from **Page attributes** panel.

After you select a page **template**, specific options will appear **under the editor**. Some of these are general options (displayed on every page) and some are template specific.

See below the options for the portfolio page template, the image is self-explanatory.

How to insert a featured image (in posts, pages or custom post types)

Each page and post has the possibility to display a featured image. The panel that allows you to upload a feature image looks like this and it's located in the bottom right hand side of the main panel, under **"Page attributes"**:

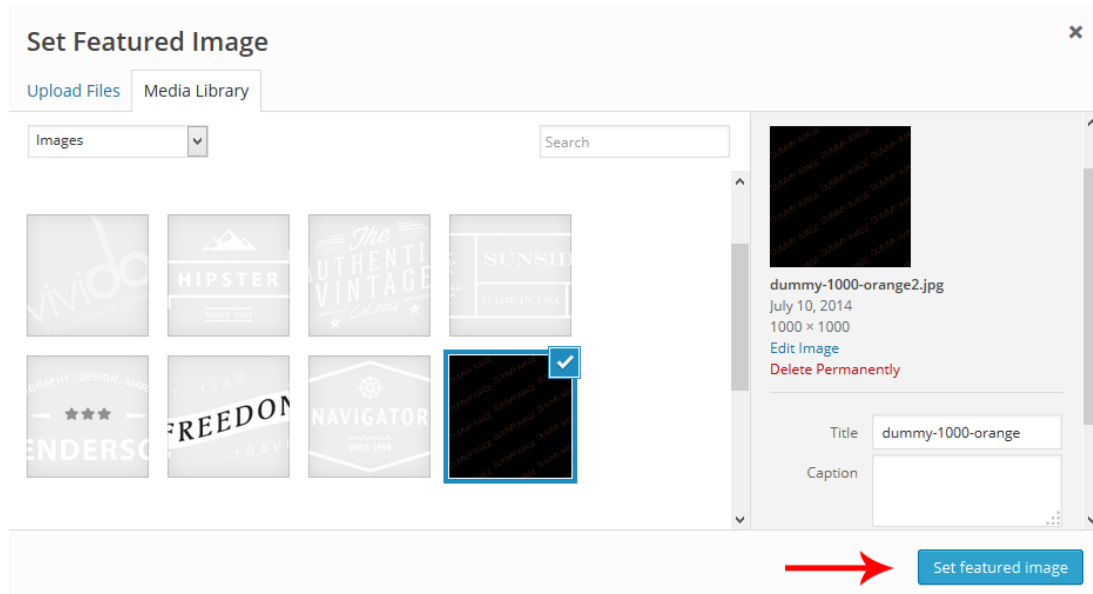

Voux WooCommerce Shopping Theme

Created: 23/03/2015 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

To upload an image, click on **“Set featured image”** link. The default media popup will appear.

Click on **“Set featured image”** after you upload your image. See below.

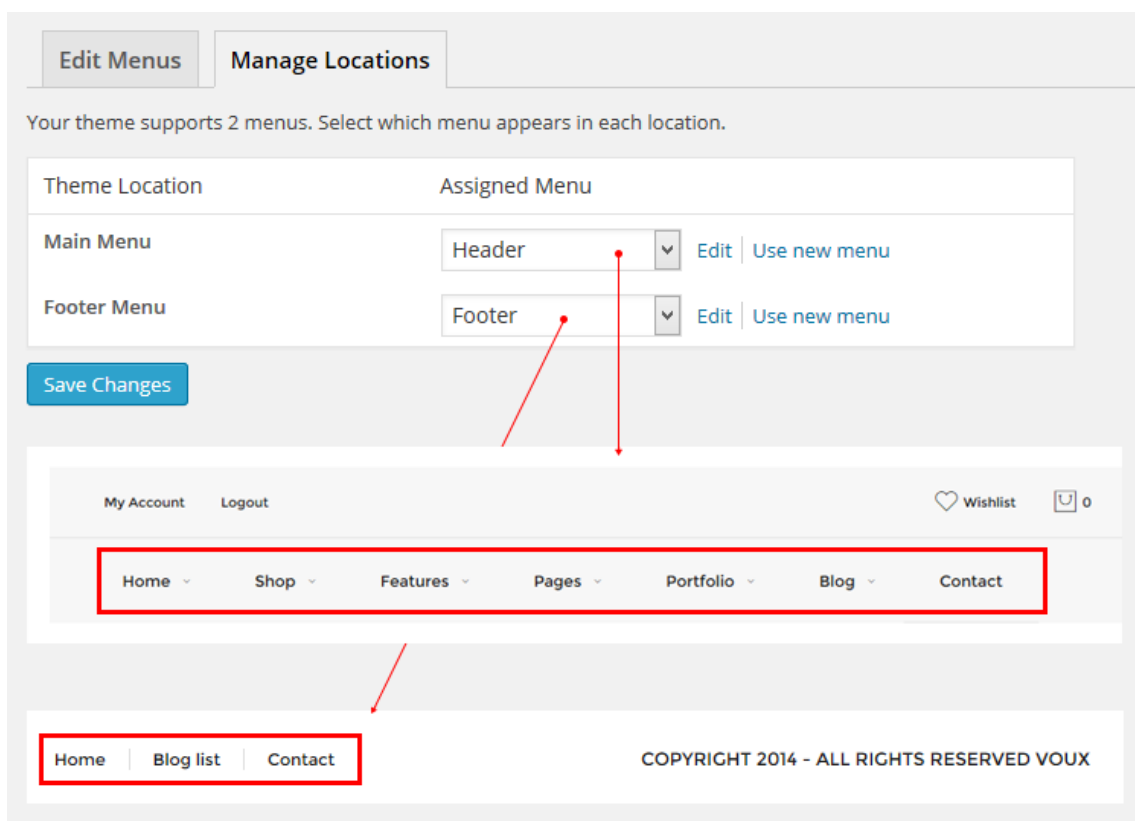

Working with the menu

You can create a menu by going to **“Appearance>>Menus”**.

The theme has **2 menu locations**.

- First menu is the theme main menu
- Second menu is the footer menu

Voux WooCommerce Shopping Theme

Created: 23/03/2015 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

To setup a new menu follow the steps bellow.

- Go to **Appearance >> Menus**
- Click on **“Create a new menu”** link
- Give it a name, for example **“Demo”** then click on **“Create menu”**

- Then, add whatever pages/posts/categories you need and click save. Tip: To create a submenu drag the menu items to the right.
- Assign the menu to the location you want from **“Menu setting”** panel at the bottom of the page, for example **“Main Menu”** (see the image bellow)

- To add an menu separator (Divider), follow the steps bellow:
 - Create a **link** menu item and insert **“Divider”** in the link text field.

- To add an Dropdown header menu, follow this steps:
 - Create a **link** menu item, insert the menu item name in the link text field and add to menu.
 - Then, open the created menu and inset in the title attribute “dropdown-header”

Visual Composer *sub item* Custom ▲

URL

Navigation Label

Title Attribute

Move [Up one](#) [Down one](#) [Out from under Features](#)

[Remove](#) | [Cancel](#)

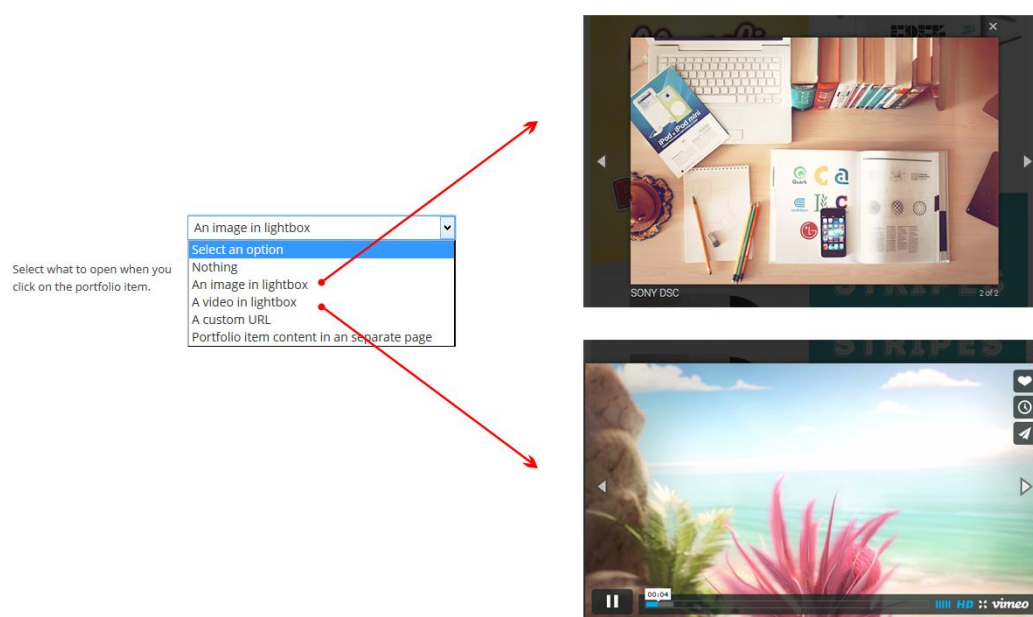

Create a portfolio item

1. Go to “**Portfolio>> Add new item**”
2. You have the possibility to insert title, image and content
3. You have a lot of possibilities on how to display your portfolio, so please see the image below for the corresponding modules.

Featured image and title

On click open an image or a video in lightbox

Voux WooCommerce Shopping Theme

Created: 23/03/2015 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

On click open a custom URL

Select what to open when you click on the portfolio item.

On click open content in a separate page

Select what to open when you click on the portfolio item.

Create a blog post

Go to **“Posts”** and create a new blog post:

- Go to **“Posts>> Add new”** (the classic way to create a post in WordPress)
- Insert a title, content and add a featured image
- Choose the post format. Select **“Standard”** for the normal blog post.

Hit Publish and you’re done.

How to work with Visual Composer

Visual composer page builder helps you create advanced layouts in minutes and it’s an essential part of the theme. Videos and tutorials can be found here: <http://vc.wpbakery.com/video-academy/>

Voux WooCommerce Shopping Theme

Created: 23/03/2015 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

- To enable visual composer create/open a page and click on “Backend Editor”.

- To insert a row click on “Add row” and to insert an element click on “Add element”.

- How to add a **fullscreen parallax image (applies for video background as well)**.
 - First of all your page layout must be set as “Fullscreen”.
 - Then click on Add row and open the row settings (click on the little pencil icon)

- Upload your background image, then from the “Row type” select **Section** and then **In Container**, that means that the background will be fullscreen and everything else you add on the row will be at the container width (1170px)

Row Type

Section

Type

In Container

Voux WooCommerce Shopping Theme

Created: 23/03/2015 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

- Then, click on **Use parallax effect** and insert the height, usually 70-80% of the image size.
- That's it.

Revolution Slider

You can find Revolution Slider at the bottom of the admin left panel.

To create a slider follow the steps below:

- Click on “**Create new slider**” button
- Give the slider a title and an alias and play with the options.
- Once you're done hit “Create slider” and then click “Edit slides” to create the slides.
- This is a very powerful slider with lots of options and effects. You can see a presentation and a video tutorial of the slider here: http://www.themepunch.com/codecanyon/revolution_wp/

Use Revolution Slider in page header

You can choose to display a slider in the header of a page. To accomplish that open a page and scroll down until you find “Page Header Slideshow” panel. You can select your slideshow and the slideshow position:

- Under the header – the menu will be displayed on top of the slider
- Below the header – the slider will be displayed under the menu

Page header slideshow
Enable/disable page slideshow
☒

Voux WooCommerce Shopping Theme

Created: 23/03/2015 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

Use Revolution Slider in a page with Visual Composer

You can insert a slideshow in the body of a page with the help of Visual Composer. Open a page, click on Visual Composer (Add element) and select “Revolution slider”.

Configuration of WooCommerce

- A very detailed documentation of WooCommerce can be found here: <http://docs.woothemes.com/document/woocommerce/>
- To personalize your WooCommerce installation, go to **Appearance > Customize > Store** tab

Create a homepage

1. Create the page

- Go to Pages >> Add new
- Insert a title, preferably **Homepage** 😊

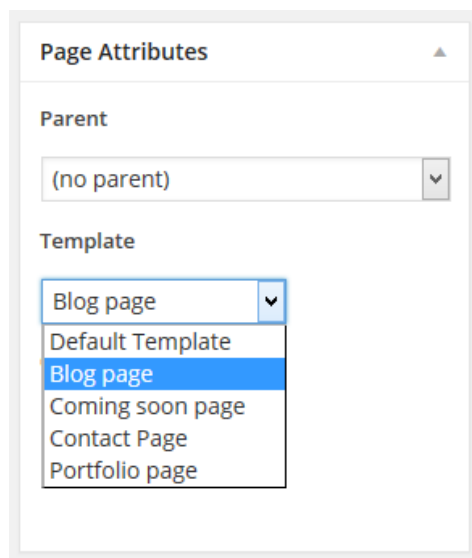

2. Set the page as homepage

- Go to “Settings >> Reading”
- Select “A static page”
- From “Front page” field select “**Homepage**” (or the name you have given to your homepage)
- Save and you’re done

Create a blog page

1. Create the page

- Go to Pages >> Add new
- Insert a title, preferably **Blog** 😊
- Select the blog template from the page attributes

- Once you select the page different options will appear under the main editor, like: blog layout, blog layout style and blog columns. Customize them as you like.

2. Set the page as blog

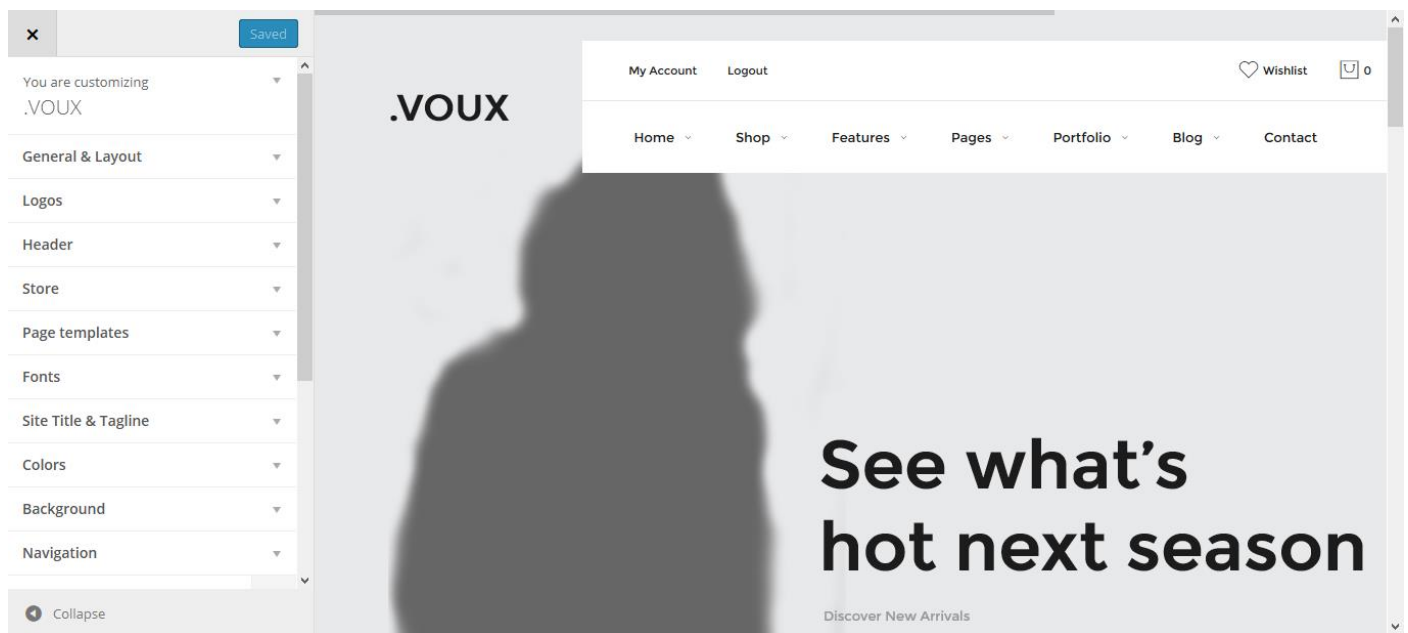

- Go to “Settings >> Reading”
- Select “A static page”
- From “Posts page” field select “**Blog**” (or the name you have given to your blog page)
- Save and you’re done

Voux WooCommerce Shopping Theme

Created: 23/03/2015 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

Theme options

All theme options are available in the default WP customize page. You can access it from **“Appearance >> Customize”**.

Note: After each change wait until the page loads again ~1 sec (refresh).

Widget areas

This theme has **11** widget areas (go to “Appearance >> Widgets” to configure them).

Those areas are:

1. Page Sidebar – used on pages
2. Posts Sidebar – used on blog posts
3. Search Sidebar – used on search page
4. Portfolio Sidebar – used on portfolio page
5. Shop Sidebar - used on WooCommerce Shop page (if woocommerce is installed)
6. Product Sidebar - used on WooCommerce product page (if woocommerce is installed)
7. Contact Sidebar - used on contact page
8. First Footer Sidebar – used in footer
9. Second Footer Sidebar – used in footer
10. Third Footer Sidebar – used in footer
11. Fourth Footer Sidebar – used in footer

Troubleshooting

If you receive a weird message at install

Like: Parse error: syntax error, unexpected T_OBJECT_OPERATOR in /home3/ (...) /wp-content/themes/VOUX/index.php on line xxx

This means you have a PHP version installed on the server lower than PHP 5.x.x. Please upgrade to a newer version.

Once again, thank you so much for purchasing this theme. As I said at the beginning, I'd be glad to help you if you have any questions relating to this theme. No guarantees, but I'll do my best to assist. If you have a more general question relating to the themes on ThemeForest, you might consider visiting the forums and asking your question in the "Item Discussion" section.
